

# Procurement Approval Matrix

Financial thresholds and required approvers

INTERNAL - CURRENT

|                |                              |
|----------------|------------------------------|
| Document ID    | APX-PROC-MTX-006             |
| Version        | 1.2                          |
| Status         | Current                      |
| Effective date | 2026-08-15                   |
| Owner          | Procurement Operations       |
| Related policy | APX-PROC-POL-014 version 3.0 |

**This matrix updates financial approval thresholds under APX-PROC-POL-014. It does not remove the Legal, Information Security, privacy, or due-diligence stages required by policy.**

## Approval matrix

| Annual commitment             | Required financial approvals                                          | Additional control                       |
|-------------------------------|-----------------------------------------------------------------------|------------------------------------------|
| Below USD 50,000              | Budget owner and Procurement reviewer                                 | Policy risk reviews still apply          |
| USD 50,000-249,999            | Budget owner, Department VP, Procurement Director, Finance Controller | Policy risk reviews still apply          |
| USD 250,000-999,999           | Budget owner, Department VP, Procurement Director, CFO                | Policy risk reviews still apply          |
| USD 1,000,000 or more         | Budget owner, Department VP, Procurement Director, CFO, COO           | Policy risk reviews still apply          |
| Regulated or high-risk vendor | CFO and General Counsel regardless of spend                           | Security and compliance review mandatory |

## Interpretation rules

- Use total expected annual commitment, including mandatory fees and committed usage.
- When the amount is uncertain, use the highest reasonably expected commitment.
- A higher-risk classification can require additional approval even when spend is low.
- This matrix controls approval thresholds from its effective date and supersedes threshold tables embedded in earlier policy copies.
